

**Maxi-Phi**  
the natural growth catalyst

## Micro Boost Xtra

A Nitrogen-free multi-mineral formulation containing Sulphate salts of Copper, Zinc and Manganese with added Boric Acid.

### Key Features:-

- A unique foundation to support early growth stage crop development
- Contains the perfect proportions of Mn, Zn, Cu and Boron
- The unique Maxi-Phi carrier system promotes active uptake
- Nitrate free formulation – no autumn restrictions
- Formulated with Sulphate's – the most effective for uptake

### Key benefits

- Ideal start to a planned nutrition programme
- Improved crop vigor
- Establishment and development enhanced
- No post application scorch
- Rapid crop response

### Statutory declaration:

	% W/W
Amount of Sulphur Trioxide soluble in water	14.5 (SO <sub>3</sub> )
Amount of Boron soluble in water	0.2 (B)
Amount of Copper soluble in water	0.6 (Cu)
Amount of Manganese soluble in water	6.1 (Mn)
Amount of Zinc soluble in water	2.3 (Zn)

### APPLICATION RATES

Maxi-phi Micro Boost Xtra should always be used in conjunction with its partner product Maxiphi Activate MP.

Use 1.25 - 5 litres per hectare in 100 -200 litres of water depending on crop requirements.
