

Maxi-Phi
the natural growth catalyst

Root Boost

A multi-mineral formulation containing Potassium Phosphonate, essential amino acids, auxins, betaines, & a range of organic chelating agents.

Key Root Boost features

- The unique Maxi-Phi carrier system promotes active uptake
- A unique stabilised and balanced formulation potassium and phosphite
- Enhanced rooting development
- No tank mixing restrictions
- Can be used as a foliar or soil placed

Key Root Boost benefits

- Improved crop vigour
- Establishment and development enhanced
- No post application scorch
- Can contribute to replacing part of soil placed phosphate

Statutory declaration:

NPK: 0 - 27.5 - 22.3

	% W/W
Amount of Phosphorous Pentoxide soluble in water	27.5 (P ₂ O ₅)
Amount of Potassium Oxide soluble in water	22.3 (K ₂ O)
<i>% are expressed in weight / weight.</i>	

APPLICATION RATES

Soil placement - 2 to 4 litres per hectare, dependent on crop & soil conditions.
Post-emergent crops - 2 to 4 litres per hectare, dependent on canopy, root mass & growth stage. Foliar - 0.5 to 1.5 litres per hectare, dependent on crop, variety & nutritional status.
