

Maxi-Phi
the natural growth catalyst

Maxi-phi Sulphur AM

A novel, easy to mix and highly plant available formulation containing Nitrogen & Sulphur

Product Features & Benefits:

Maxi-phi Sulphur AM contains: Nitrogen 11.3% Nitrogen & Sulphur 64.9% SO₃
The nitrogen is in the ammoniacal form.

Both nutrients in Maxi-phi Sulphur are 100% plant available and are rapidly absorbed by the plant and do not require oxidation to become available like powder or flowable formulations.

Maxi-phi Sulphur AM will help to balance plant nitrogen use, making the crop more nitrogen efficient.

Maxi-phi Sulphur AM will significantly improve the plants own defenses against foliar diseases.

Maxi-phi Sulphur AM at 2 l/ha is equivalent to applying 30 kg of SO₃ via bulk soil applied products, particularly useful with bean, pea, potato & sugar beet crops.

APPLICATION RATES Foliar – 1 to 5 litres per hectare, dependent on crop, variety & nutritional status.
