## Maxi-phi Sulphur KS

A novel, easy to mix and highly plant available formulation containing Potassium & Sulphur.

### Product Features & Benefits:

Maxi-phi Sulphur KS contains:

Potassium 25% K<sub>2</sub>O & Sulphur 42.25% SO<sub>3</sub>

Both nutrients in Maxi-phi Sulphur KS are 100% plant available and are rapidly absorbed by the plant and do not require oxidation to become available like powder or flowable formulations.

Maxi-Phi Sulphur KS will help to balance plant nitrogen use, making the crop more nitrogen efficient.

Maxi-Phi Sulphur KS will significantly improve the plants own defenses against foliar diseases.

Maxi-Phi Sulphur KS at 2 l/ha is equivalent to applying 30 kg of SO<sub>3</sub> via bulk soil applied products, particularly useful with bean, pea, potato & sugar beet crops

APPLICATION RATES Foliar – 1 to 5 litres per hectare, dependent on crop, variety & nutritional status.
